

Project Demo Planning

Date	04 July 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S. No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the networking challenge, objectives, and motivation behind the solution.	2	Maliga Charishma
2	System Architecture & Technology Stack	Explain the overall architecture, Streamlit frontend, FastAPI backend, DistilBERT, GPT-2, and Wikipedia API integration.	3	Challa Praveenkumar
3	Live Application Demonstration	Demonstrate entering an event description and interests, generating conversation starters, viewing extracted themes, fact verification, history, and feedback features.	6	Naidu Sashank
4	AI Models & Backend Workflow	Explain how DistilBERT extracts themes, GPT-2 generates conversation starters, and FastAPI coordinates the workflow.	3	Maliga Charishma
5	Testing & Project Documentation	Present testing approach (Pytest, manual testing), documentation, and project structure.	2	Challa Praveenkumar
6	Conclusion & Future Enhancements	Summarize project outcomes, discuss limitations, future improvements (Gemini API, database, cloud deployment), and answer questions.	2	Naidu Sashank

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for an AI-powered networking assistant and define the project objectives.
2	Solution Overview	Present the architecture, technology stack, and workflow of the application.
3	Live Feature Demonstration	Show the complete workflow: enter event description and interests → extract themes → generate conversation starters → verify facts → demonstrate history and feedback.
4	Q&A Session	Answer evaluator questions, discuss challenges, limitations, and future enhancements.
